DETAILED ACTION

Applicants remarks have been fully considered.

Rejections under 35 USC 112 2nd paragraph are withdrawn in view of applicant's amendments.

Rejection of claims 1 and 3 under 35 USC 102(b) over Behringer et al. is withdrawn in view of applicant's amendments.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term substrate found in line 3 of the claim is indefinite. There is no limiting definition of the term substrate in the specification or in the claims. It is unclear what is included and what is excluded by the said term.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandee et al. (*Journal of molecular catalysis A: Chemical* **2002**, 182-183, pp309-317). On page 312 Sandee et al disclose compound **3**, 2-(diphenylphosphino)ethyltrimethoxysilane (see structure of compound 3 on page 312 and column 1, lines 3 and 4 on page 312). The said compound is the same as 1-diphenylphosphino-2-trimethoxysilylethane of the instant claim 1. The intended use of the compound for forming copper undercoat films is not considered further limiting. It is well settled that the intended use of a composition or product (e.g. as a cosmetic composition) will not further limit claims drawn to a composition or product, so long as the prior art discloses the same composition comprising the same ingredients in an effective amount as instantly claimed. See, e.g., *Ex parte Masham*, 2 USPQ2d, 1647.

Claim 3 has limitations directed to the ability of the material to bond to a substrate via Si-O bonding. Such a limitation is an inherent property of compound **3** disclosed by Sandee et al. Compound 3 inherently is capable of bonding to a substrate via Si-O bonding. This property is inherent to compound **3** because it is the same compound as claimed in the instant claim 1 and all the compounds of claim 1 are presumed to have the said bonding property.

Conclusion

Claims 1, 3, 5-9 and 12-16 are pending

Claims 5-9 and 12-16 have been withdrawn

Claims 1 and 3 are rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
